

## THE HAUS OF LEGENDS

### Declaration of AI-Assisted Artist Rights

Art evolves. Tools transform. Human imagination endures. As creators we stand at the threshold of a new era — one shaped by human vision and amplified by artificial intelligence — The Haus of Legends recognizes the necessity of a clear, empowering framework that protects, respects, and celebrates the artists who wield these emerging tools. This Declaration affirms the inherent value of human creativity and establishes the rights of all artists working with AI-assisted methods. It is a commitment to artistic freedom, ethical innovation, and the protection of creators navigating an evolving technological landscape.

---

#### Article I. The Right to Authorship

Every artist who uses AI as part of their creative process retains the right to be recognized as the *author* of their work when their vision, intent, and creative judgment shape the final artistic expression. AI is a tool of amplification, not replacement. Human imagination remains the source of authorship.

---

#### Article II. The Right to Creative Tools

Artists have the right to access, explore, and experiment with AI technologies without stigma, discrimination, or the devaluation of their work simply because it was created with modern tools. Innovation is not a threat to art; it is the lifeblood of artistic evolution.

---

#### Article III. The Right to Copyright Protection

Where a human artist directs, curates, selects, refines, or meaningfully contributes to the creation of an AI-assisted artwork, that artist retains the right to seek legal protection for their contributions through copyright or other appropriate legal frameworks. Human creativity deserves protection regardless of the medium.

---

#### Article IV. The Right to Transparency & Ethical Practice

AI-assisted artists have the right to: Clear information about how tools operate Transparency from platform providers. Ethical training practices that respect the work of other creators. And they share a responsibility to use AI in a manner consistent with fairness, respect, and artistic integrity.

---

#### Article V. The Right to Artistic Identity

AI-assisted artists have the right to claim, define, and evolve their artistic identity without external pressure to conform to traditional methods or outdated ideas of “legitimacy.” AI is a collaborator, not an eraser. The artist’s voice remains sovereign.

---

## Article VI. The Right to Creative Autonomy

Artists maintain full autonomy over: Their concepts, Their process, their iterations, Their final selections, Their contextual interpretation. No algorithm can dictate meaning, expression, or final intent. These belong solely to the human creator.

---

## Article VII. The Right to Fair Commerce

AI-assisted artists have the right to: Sell their work. License their work. Protect their brand. Build sustainable creative careers. Without being undermined by legal uncertainty or systemic bias. Commerce must evolve to honor new artistic labor, not suppress it.

---

## Article VIII. The Right to Be Heard in Cultural and Legal Debates

Artists using AI have the right to participate in shaping the policies, ethics, and legal frameworks that govern their creative landscape. No conversation about the future of art is complete without the voices of those creating it.

---

## Article IX. The Right to Innovation Without Fear

Creators must be free to explore AI-assisted art without fear of exploitation, censorship, or invalidation. Curiosity is not a crime. Discovery is not an infringement. Experimentation is not an ethical failing.

---

## Article X. The Artist's Inalienable Vision

No matter the tool, the medium, or the method, the flame of human imagination cannot be automated, replicated, or replaced. The artist is not defined by their tools but by the force of their intention, the clarity of their vision, and the courage to create in defiance of limitation.

---

## Conclusion: A New Renaissance

This Declaration stands as a guiding star for the artists of today and the legends of tomorrow. The Haus of Legends affirms that the future of art belongs not to machines, but to the humans who dare to wield them with vision, integrity, and audacity. AI can enhance creation — but only humanity can give creation purpose. Let this era be defined not by conflict between human and machine, but by collaboration, empowerment, and the boundless expansion of what art can become.
